BY

Katzkin

Katzkin.

In 1983, Mitchell Katz began distributing high quality leather hides to trim and conversion shops throughout the United States. Using uncompromising standards, it wasn't long before Mitch gained a reputation as a source for superior leather. He soon discovered that the demand for leather automotive interiors was suppressed by the expense of having seat and door panel covers customized. Thus was born Katzkin.

With the same commitment to quality, Katzkin designed seat and door panel covers that became direct replacements for factory cloth and vinyl. This allowed auto dealers to offer top quality leather at an affordable price, which meant that everyone could enjoy the luxury of leather, not just the owners of high-priced luxury automobiles.

Now, 23 years later, Katzkin is the industry's leading aftermarket leather interior manufacturer, with over 2500 authorized installers nationwide, offering more than 2000 interior patterns. All those patterns can be ordered in a variety of two-tone combinations in more than 95 colors and materials with available options such as piping, contrast stitching, perforation, and custom embroidery.

At Katzkin, there's no end to the possibilities.

V.2007/1

Mopar Performance and Katzkin Leather, Inc. have joined together to offer Dodge, Chrysler and Jeep dealerships a revolutionary interior program. Now, for the first time ever dealerships can order Katzkin leather interiors with nearly unlimited custom options for no extra charge.

The options are almost endless:

- Over 70 two-tone colors
- Custom stitching, Perforation and Piping
- Dodge, Chrysler and Jeep embroideries
- Many other custom packages and options

DaimlerChrysler dealerships can now order complete interior packages and installation directly through the Mopar parts order system (DealerConnect). This ensures ease of ordering and greater accountability. From start to finish, custom interiors are now easier than ever because of the new partnership between Katzkin Leather, Inc. and Mopar Performance.

SAFETY IS OUR TOP PRIORITY!

In the early 1990's, Katzkin took the lead in our industry by being proactively involved with safety issues. We began by ensuring that the construction of our seat covers provided for the proper deployment of side impact airbags. As part of this process, we initiated both in-house and independent testing of our covers. These tests demonstrated that our covers, when properly installed, did not interfere with the operation of the side impact airbags.

Katzkin then set an industry precedent by backing our product with a \$51 million product liability insurance policy, issued by the world's highest rated insurance company.

In 2002, we began researching and testing our interiors for the impending new federal regulation requiring the introduction of Occupant Classification Systems (OCS). Again, testing showed that our interiors, when properly installed, did not interfere with the operation of the Occupant Classification System. Before the year was over, we created our Katzkin OCS Manual, a guide to understanding these new safety systems.

As of today, we are the **ONLY** aftermarket leather interior company approved by a major OE manufacturer (DaimlerChrysler) for installation of our covers on their vehicles equipped with OCS. And we continue to test our product using the top independent research laboratory in the country – the same lab that the OE's and the National Highway Traffic Safety Administration use.

At Katzkin, we take safety seriously. You should too.

FOOSE

D E S I G N

Chip Foose, world renowned automotive designer and host of the hit television series Overhaulin', has turned his talents to the new Dodge Charger. Each seat in the Chip Foose-designed Katzkin leather interior package from MOPAR is made of Katzkin's premium Tuscany leather with perforated inserts and an embroidered Foose Edition logo, and is available in multiple color combinations.

Other options on the Foose Edition Charger, available through MOPAR, include the MOPAR Chrome Wire Mesh Grille Inserts and the MOPAR Cat-Back, Free-Flow, Dual-Outlet Exhaust System.

Chip also designed the distinctive wheels on this Foose Edition Charger. For more information on these and other Chip Foose wheels visit his website at www.chipfoose.com.

Suedezkin

Nothing compliments Katzkin's supple leathers like the softness and style of Suedezkin. And for an added touch of luxury, Suedezkin looks great perforated. Because this synthetic suede has been our most frequently ordered two-tone accent material, we've now expanded our selection to include these 15 unique colors.

auto Exotics

When leather isn't enough to give your automotive interior that unique look, Katzkin's AutoExotics are the answer. For example, try the look and feel of ostrich and crocodile which have been simulated on genuine cow hide. Or, for a more contemporary look, you can accent your two-tone with our synthetic Carbon Fiber and Machined materials.

Tuscany

In 2004, Katzkin introduced Tuscany, a leather softer and more luxurious than any leather ever offered for automotive use. Available at first in only four colors, Tuscany elevated opulence to decadence, but the demand for this "one-notch-higher" luxury was overwhelming. Katzkin is now pleased to offer Tuscany in these 14 rich colors.
